

**Nebraska Information Technology Commission
State Government Council**

**Security Architecture Workgroup
Charter**

Purpose	Prepare policies, standards, and guidelines for the security architecture for state government. Make recommendations to the State Government Council and Technical Panel on matters relating to security within state government.
Lead Agency	Office of the CIO
Scope / Boundaries	Security architecture includes protection of the physical, intellectual, and electronic assets of the State, including its security polices, network access controls, virus protection, network administration, transaction security, and workstation security. The security architecture must address issues relating to authentication, authorization, confidentiality, data integrity, non-repudiation, and isolation which includes all wired or wireless data communication inbound and outbound of the State's protected network environment.
Desired Goals and Outcomes	Educate – provide information to state agencies, policy makers, and citizens about security issues. Research – document existing problems, potential points of vulnerability, and related risks. Requirements – determine security requirements of state agencies stemming from state and federal laws or regulations. Recommendations - make recommendations to the State Government Council and Technical Panel regarding security policies, standards and guidelines.
Membership	Facilitator – State Information Security Officer Each state agency may have a representative participate on the workgroup. Additional members may be approved by the Facilitator.
Reporting	The Facilitator will report to the State Government Council and Technical Panel as needed.
Timeframe	This workgroup will continue in existence until this charter is repealed.

Approved by the State Government Council on February 14, 2013.
