Status Report Update

UPDATE FOR MAY 2025 – The 2022 grant funds will come to an end in August of this year. We will be ordering enough equipment to finish the NE Region. We did get approval at Thurston County to utilize the Rural Water District Tower, however, they will be painting it and asked if we could wait until the end of August. The fiber connection into Papillion has been completed and the pass through the Orion network has been accomplished. Our tech crew has been monitoring this to make sure there are no dropped packets. The quotes for fiber from O'Neill Dispatch to Ainsworth Dispatch have come in. Most likely we will stick with the OPTK option as it is very affordable. The SE Region as requested a few of us to come and discuss MOU/s, Contracts, electrical charges, etc. at their next meeting which will be Thursday, June 12.

UPDATE for APRIL 2025 – NRIN has renewed its contract with NPPD, giving us their Juniper technician for 6 months. This will assist us in configuring routers for replacement in multiple parts of the state. Request for router assistance from the OCIO has been denied due to workload. The North East region has been installed with the exception of the Thurston Water Tower. Delays are due to illness and board approval. The Southeast region is deciding on the benefits of having NRIN as their backup solution and will make a decision within the next month. New fiber from Nebraska City to Auburn would make it cheaper than building a new tower. The South Central region is just waiting approval from NPPD to finalize our hop from Alda to Superior. The new Nelson Dispatch tower is done, and the NRIN equipment will be installed with the rest of the South Central regional sites. A request for fiber from O'Neill to Ainsworth is waiting approval – that would complete the North Central Region.

Status Report Update

OCIO Update:

Labor Distribution - Work was not completed by the expected 2/14/25 date, nor 4/11/25, and we are still awaiting full delivery. 1 out of 5 agency distribution configurations are currently ready for testing; Agriculture SME to begin testing on 6/5/25. Validation and end-to-end testing with remaining agency SMEs to follow once labor distribution solution is delivered.

Telestaff - Both DCS and DHHS are currently working on assignment template configurations for the Telestaff side.

Schedule - Currently we have a tentative go-live date set for August 4th, 2025 for the first implementation group. Groups 2, 3, and 4 are to follow (30 day implementation for each group). The labor distribution is on the critical path, so due to the consistent delays with delivery, I expect the go-live dates to be pushed back according - approximately 3 months. Awaiting availability of UKG PM to re-baseline the project schedule based on current progress.

NDOT Update:

Production Issue with Overtime Compensation:

- The issue with compensation of overtime during the holiday is nearly resolved and on track to be closed soon. HR will replicate work around and resolution in Prod.
- A couple of work sessions are scheduled for this week to work with HR. -- NDOT

NDOT API Development:

- NDOT team is making great progress on the API work, and overall development is advancing well. NDOT

UKG Integration:

- Progress is slower than anticipated, but the team is actively testing the recent changes to resolve integration issues. UKG
- Work sessions were held to continue progress on the integration. We will also schedule additional work sessions as more issues have surfaced or resulted from testing changes.

Next Steps:

- Overtime Compensation: Monitor final resolution and confirm resolution. -- NDOT
- API: Continue development and prepare for testing/QA phase. NDOT
- UKG Integration: Continue with testing UKG changes to address integration issues. Additional work sessions will be scheduled. NDOT/UKG
- Work Sessions: Maintain schedule to ensure continued progress on integration. UKG /NDOT

Risks & Concerns:

- Delays in UKG integration continue to impact timelines if not resolved quickly. No timeline has been established. UKG
- Coordination between teams remains crucial to keep integration efforts aligned. UKG / NDOT

NSP Update:

NSP is planning for go-live on 6/30/2025.
