

I. Action:	Co-sponsor the NIDCAC study on Local Government Technology Needs
II. Sponsoring Entity:	Community Council NIDCAC
III. Goals and Objectives:	To assist local governments in their efforts to utilize information technology by: <ul style="list-style-type: none"> ● Identifying local government requirements, ● Defining connectivity requirements and infrastructure, ● Identifying opportunities to share applications, support services, and database creation, and ● Promoting citizen access to local government services.
IV. Justification / Rationale:	Information technology presents new opportunities for state and local governments to develop and deliver cost effective services. Several communities within the state are implementing integrated digital services. Without a coordinated effort to assist communities, these efforts will continue on a piecemeal basis.
V. Work Plan:	Committee members met in October, November, and December to determine the IT needs of local governments.
VI. Required Resources:	Time of participants
VII. Estimated Cost (if appropriate):	No additional resources are required.
