<p>Business Assistance Center (BAC) [Incubator Without Walls] - BAC creates an environment in which small and new businesses can be successful in the global economy. BAC programs are important tools for helping businesses reach success. Individuals will be assisted by the increased employment opportunities created through the Center. The program is designed to serve multiple clients by providing professional services to small and/or new businesses. The incubator helps meet one of the goals of the Box Butte Development Corporation to support and encourage the development of new businesses and the retention of existing businesses. Access to information, technology, and business equipment at no or low cost helps get new businesses off of the ground. Because we do not intend for businesses to become dependent upon the Center, fees are designed to wean businesses off the Center's services over a period of time. A list of usage and rental fees is available in the BBDC office.</p> <p>Project with Heminford is in progress to utilize broadband to allow people to work at home doing medical transcription. Information and training is available to all those in the area that is interested. Contact the Box Butte Development Corporation for more information. All the program sponsors are interested in making economic development a reality in western Nebraska. Being in rural Nebraska shouldn't stop you from havin and interesting, well paying job with benefits. If you are successful, we can be successful.</p>

Project overview – Steve Hannah detailed the project as set forth under the grant the NGP received from the US Dept of Labor. This project is titled “Building an eBusiness Ready Workforce in the Northern Great Plains”. The project is for developing and enhancing internet use in rural businesses and for education and training employees in the internet applications. Exploring and building awareness of opportunities the internet brings to businesses will be an essential component. Equally important to the success of the project is the development of a long-range plan to support ongoing training and technical support needs of the workforce in our communities. The NGP group will provide 40 hours of training in Cambridge based on what our local committee determines is needed. Besides the NGP training, an educational partner(s) will be needed for additional classes and training.

2. NGP educational curriculum (info below was found online)

Historically the NGP staff involved themselves in a broad range of information technology related activities, including research of current trends in telecommunications and information technologies and how these technology trends will impact on the Region’s businesses and industries. The intended outcome of this effort is to bring practical information and solutions to the Region’s communities, businesses and organizations through workshops and hands-on training.

For 2001 the NGP staff has developed seven workshops with a focus on awareness or technology transfer to assist the Region’s businesses and industries to move forward with their efforts in Internet communications and marketing, or what is often called eBusiness. The workshop series is geared towards several levels of eBusiness experience starting with businesses with almost no experience to those with some experience but are not getting the results they expected. Titles and a brief description of the workshops are listed below.

Development Strategies for a Business Website

This session examines current business website trends, implementation, and opportunities with a focus on website development strategies for small to medium businesses and organizations. This workshop is especially valuable to businesses and organizations that don’t have a website but want to get started on one and add an Internet presence to their marketing efforts.

Information System Security - What Every System Administrator Should Know About Data Vulnerability This intensive one-day seminar introduces participants to the security issues businesses will encounter when deploying an eBusiness strategy. The discussions follow two tracks, Local and Wide Area Network security and Internet security. Lecture is interspersed with actual demonstrations of the technologies discussed in the seminar.

eBusiness: Fundamentals

This comprehensive Internet business awareness workshop looks at the steps in the process of implementing an eBusiness strategy, defining the eBusiness enterprise, and meeting the challenges of changing business relationships. The workshop takes a look at what factors are affecting the adoption of an eBusiness strategy as well as possible business benefits of an eBusiness initiative.

Trends in Telecommunications and Information Technologies that will Impact Communities and Small Business

This workshop examines the trends in telecommunications and information technologies, and the potential impact these coming changes will have on how communities and businesses provide services to their citizens and customers.

Website Design Fundamentals - Introduction to Web Page Design Using NetObjects Fusion

This one-day hands-on workshop focuses on issues related to building a website, including what makes good website design and how to avoid the worst mistakes related to poorly designed websites. This website design class uses the award-winning NetObjects Fusion editor. The course covers the key website development features of NetObjects Fusion starting with creating a site, using the site management tools, adding advanced content, and publishing a site to the World Wide Web

Electronic Commerce Workshop – Building an Online Store through an Application Service Provider

This day-long workshop looks at the issues related to moving an informational website into an eCommerce website capable of taking orders online. This workshop focuses on four entry level online store building tools and realistic options for businesses that want to get an online store up and running fast with a turn-key solution provided by an Application Service Provider(ASP). The workshop centers on the store front website from the perspective of both the shopper and the store manager, looking at issues related to order security, ease of ordering, how orders are retrieved, and building and managing your own online store. Examples of ASP's that will be discussed include -Yahoo Store, Jumbo Mall, Impulse Software, PayFlow Link, iCat – iStore PNC, goBIZgo

Website Promotion to the Search Engines - How to Make it Easier for Customers to Find Your Website through a Search on the Internet

The focus of this workshop is to give participants an understanding of how their website would be found through a search on a search engine. Participants will learn to recognize the relationship between website domain names and search engines. They will gain an understanding of the process of registering their website with a search engine and how to check results. The workshop also covers issues related to maintaining search engine listings and managing domain names. Participants will learn how to check on the status of your domain name registration record and make modifications to the record with Internic.

3. Educational partners to consider — Steve Hannah concurred that more than one educational partner could be selected. Thinking outside-the-box on non- traditional resources is encouraged. Steve also confirmed that participation from anyone in the region – not just Cambridge – is encouraged. The participants will most likely contribute financially for the classes, but the grant should make a real difference in affordability. Steve encouraged stretching and leveraging the grant as far as possible.

- Central Community College – local partner for distance/adult learning programs www.cccneb.edu
- Peter Kiewit Institute – Southwest Nebraska Initiative outreach/interns www.pki.uneb.edu
- UNL – Edge Program curriculum <http://nebraskaedge.unl.edu> for entrepreneurship training – agriculture/small business

Type of Service: Technical Assistance, Funding/Grants, Advocates for implementation of high-speed Internet services throughout Cass County			
<p>The Cass County IT Task Force is a volunteer organization of technology and business professionals from throughout Cass County with one goal; to bring high speed Internet service to all of Cass County. The Members section lists all volunteers that are working for this important goal.</p> <p>Our short-term goal is to implement two wireless service areas by the end of 2002. Our midterm goal is to bring service to the major areas of the county by the end of 2003. In the year 2004 we will work on technology solutions for areas that are still without service.</p> <p>Update of 7/11/02: We expect to meet our mid-term goal by the end of 2003.</p>

Holton, ROSP Program Director</p> <p>Center for Rural Affairs 101 S Tallman St., P.O. Box 406 Walthill, NE 68067 Phone: 402-846-5428 Fax: 402-846-5420 E-mail: info@cfra.org or reapinfo@cfra.org</p>	<p>Rural Nebraska</p>	<p>http://www.cfra.org and http://www.cfra.org/reap</p>
<p>Type of Service: Education/Training, Technical Assistance, The Rural Opportunity and Stewardship Project (ROSP) currently works with communities in revitalization endeavors.</p>			
<p>REAP’s Women’s Business Center will be sponsoring 4-night eCommerce training courses for small businesses regionally across Nebraska (\$49, includes REAP membership). Also, Basic Business Plan Training courses will be conducted across the State (\$30 course fee and REAP membership + \$35 for materials which may be covered by income eligible scholarships). REAP offers individualized business planning assistance and ongoing technical assistance services to clients. REAP also makes micro-loans to small businesses.</p> <p>ROSP is currently working with rural communities in partnership with REAP and the policy program within the Center for Rural Affairs in a holistic package project called HOPE. We have worked with the various agencies in doing comprehensive planning which includes technology needs and goals.</p> <p>Project HOPE also helped sponsor an entrepreneurial workshop with Congressman Tom Osborne in Plainview, NE that looked at technology and the various uses. The package project also includes training in Beginning Farmer activities as well as working with community foundations on asset transfers.</p> <p>The Center for Rural Affairs works as a resource provider in many different areas. REAP and ROSP are just two of the many endeavors currently active with the Center. There is also an active policy program that works in maintaining and creating policies that help rural Nebraskans to a better condition. Information technology is a key issue in the smaller communities as well as the larger urban populations. How we deal with IT will help us in our work in saving rural Nebraska.</p>

Nebraska Information Network	Roger Hahn P.O. Box 81309 500 South 16 th - 3 rd Floor Lincoln, NE 68501-1309 Phone: 402-436-5020 Fax: 401-477-5130 E-mail: roger.hahn@alltel.com	Statewide	http://NIN-Telecom.com
Type of Service: Education/Training, Technical Assistance, Funding/Grants, Services that are available			
<p>Power Point Presentations on (almost) any topic regarding telecommunications – Examples:</p> <ul style="list-style-type: none"> - Knowing Your Local Telephone Company How all the telephone companies work together to provide one seamless network, end-to-end monitoring and trouble alarms, how prices are set, how revenue is shared, how joint projects are coordinated, how routes are established but customers only pay for airline miles, issues caused for rural areas because of the LATAs, etc - Describe the various transport services and how they are all provided over the same network and interact at the telephone switch public switched transport, private line dedicated transport, frame relay transport, ATM transport, IP transport, VPN transport. etc. - Applications of communications technology for distance learning, telemedicine, economic development. - Have thirty-seven years experience in almost all phases of telecommunications and some knowledge on policy issues, funding issues, financial requirements, technical operations, network management.... AND access to dozens of “experts.” Willing to do initial phase consulting work to help get projects started. Depending on situation may be able to help with entire project or work with others who are brought into the project. - Will help with preparation of grant applications by providing technical design assistance and cost estimates. Am also willing to help with the (All so critical) wording in the grant application..... The many years of writing authorizations for funding projects in the telecommunications industry is very similar to some aspects in grant writing. Plan to, sometime in the future, to be able to help find grant funding sources. - Will help identify telecommunications assets that are already in place that can be put to greater use to help communities. There is a large amount of telecommunication capacity that is under utilized. There is also great willingness among the telephone companies in Nebraska to provide additional services when a business case can be completed to substantiate the benefits to the community that will eventually cover or approach covering the investment required.

Building Information Technologies Mini Grant Program

The University of Nebraska's Technologies Across Nebraska (TAN) initiative, in partnership with the Nebraska Information Technology Commission's Community Council is offering \$2,500 mini grants for information technology planning efforts. Eight Nebraska communities or regional groups will receive up to \$2,500 in funding for conducting community assessments or other activities which support the development of community or regional plans to utilize information technology to enhance community and economic development.

The communities or regional groups receiving the planning mini grants will also serve as pilot communities for the Community Information Technology Toolkit materials developed by the Nebraska Information Technology Commission and Technologies Across Nebraska (<http://www.nitc.state.ne.us/toolkit>). Regional resource teams from Technologies Across Nebraska will provide assistance to the pilot communities or regional groups. An electronic discussion list will also link members of community information technology committees together so that they can learn from each other. Information on the mini-grants program is available at <http://www.nitc.state.ne.us/toolkit/minigrants.htm>.

Applications must be received by August 1, 2002.

Community Information Technology Toolkit

<http://www.nitc.state.ne.us/toolkit>

The Community Information Technology Toolkit provides information and resources to help communities integrate information technology into their development plans. The toolkit contains information on strategies and resources related to technology-related development, frequently asked questions, and success stories. The toolkit is a collaborative effort of the Nebraska Information Technology Commission and Technologies Across Nebraska. Updated materials will be posted to the toolkit in August 2002.

ITCommunities List

This e-mail discussion list includes participants of the Building Information Age Communities conference held in Aurora on April 12, 2002. The list is open to anyone in Nebraska with an interest in IT development.

Community Technology Fund

Since September 1998, 40 projects have received a total of \$834,200 from the Nebraska Information Technology Commission's Community Technology Fund. The projects funded demonstrate how information technology is being used to improve efficiency and enhance economic development. Grant projects range from a joint library automation system which saved three libraries thousands of dollars to a technology business incubator. A recent report highlights the projects funded from the 2000 and 2001 rounds of the Community Technology Fund and shares lessons that can be learned from these projects. (<http://www.nitc.state.ne.us/cc/grants/2002/CTF0102report.pdf>)

No time frame has been established for future rounds.

Information on the Community Technology Fund can be found at <http://www.nitc.state.ne.us/cc/grants>
