# Accessibility Benchmarks

Website Accessibility

The WebAIM Million (https://webaim.org/projects/million/) is WebAIM's accessibility evaluation of the home pages for the top 1,000,000 web sites.

- **The one million home pages assessed had an average of 50.0 errors per page**.

- Government home pages had an average of 28.6 errors per page. Government home pages had on average far fewer errors than home pages for other sectors.

- Most conformance failures fall into six categories, as shown below.

Home pages with most common WCAG failures (% of home pages)

PDF Accessibility

- Over 250 blind and low-vision assistive technology users across the United reported that 67% of PDFs they encountered were either partially or entirely unreadable. (https://equidox.co/blog/pdf-accessibility-survey-says-67-of-pdfs-will-get-you-sued/)

Note: We will probably do an assessment of government websites and pdfs.
