Network Nebraska Website Survey Comments, September-October, 2010

5. We invite you to paste the URLs of websites that you have found to be attractive, easy to navigate, or demonstrate the appearance and functionality appropriate for the Network Nebraska-Education Website:

1. http://www.lps.org/

   There aren't many better than those designed by Brian Fitzgerald!

2. http://www.wa-k20.net/index.php
   http://www.ucr.edu/
   http://www.stthomas.edu/

3. http://www.kanren.net/ Simple but provided essential information.
   http://www.more.net/ Had ALOT of information (maybe too much for consumption) but did have a login feature for member services.
   http://www.merit.edu/about/ Similar to morenet. Again a lot of info.
   http://www.uen.org/ Included services outside and beyond Network Nebraska. Didn't care for site.
   http://www.wa-k20.net/ At first I didn't think much info was there but after some searching did find good resources. Info good but not easily found.

6. It would be nice if... (final comments, suggestions, observations)

1. It seems this site serves two groups, public and private
   Would it be two websites? One for PR and one for member support?

2. Billing information were available on the website and current contact information.

3. Our site needs work but part of that will be gathering the information that we want to list on the site. I think this survey asks the right questions.

   I would caution against putting too much information that is simply file drawer information that clutters the site.

4. there was a speed-test app integrated with the new site
