### Tentative Discussion Questions

1. To date, the eHealth Council has focused on establishing a vision for eHealth in Nebraska and in implementing the State HIE Cooperative Agreement. What should the role of the eHealth Council be over the next few years?
2. Much of the work of the eHealth Council to date has focused on health information exchange. Are there new technologies that deserve further attention?

3. What representation should be included in the membership of the eHealth Council?
