

### **8-102. Scope.**

(1) This policy applies to all information technology systems for which the state has administrative responsibility, including systems managed or hosted by third parties on behalf of an agency. In the event an agency has developed policies or additional requirements for information security, the more restrictive policy will apply.

(2) Portions of this policy are based on the standards, guidelines, and best practices developed by the National Institute of Standards and Technology (NIST), including the NIST Cybersecurity Framework (<https://www.nist.gov/cyberframework>) and related publications (<https://csrc.nist.gov/publications>). Additional items contained in these NIST publications—that are not included in this policy—should be treated as guidance and best practices to be followed by agencies as appropriate.
