<p>Now reporting Quarterly. No report required for December.</p> <p>November update: ACCESSNebraska transition continues. In October, staff moved into the Lexington Customer Service Center. This staff will move to Universal Case Management in January 2012. The Scottsbluff Customer Service Center started transition to Universal Case Management and answering phone calls. There were approximately 30 workers answering telephone calls as of October 31. Staff and caseloads began transitioning into Universal Case Management from Central and Western Service Areas. This transition will continue through February 2012. The transition is currently 80% complete.</p> <p>On the technology side, October 3, we added a Submit Documents application to the ACCESSNebraska web site. This application accepts documents in .tif and .jpg file formats. We have had 2,130 pages submitted in October utilizing this feature. We have had to reject 15% of the documents submitted. This is usually due to the document not being readable. Customer feedback has been positive about the application. Users especially like the email that confirms the document has moved into the Document Imaging System. An email is also sent when we are unable to accept the document into the system and offers different ways to get the document to the Department.</p> <p>Testing has been completed on an automated Interview Scheduler that will be put into production on Nov. 13. This tool will schedule a required interview when an application is received by the State. Testing is currently occurring on a new phone dashboard that will provide staff statistics on their computers as to number of calls in wait and average wait times.</p>

<p>Applicant Tracking (NEOGOV)</p> <ul style="list-style-type: none"> Data from eight states have been compiled. NEOGOV is beginning a review of possible vendor partners. NEOGOV is also planning to have testing software available by the end of the year. <p>Learning Development & Performance (Cornerstone OnDemand)</p> <ul style="list-style-type: none"> Continuing to work with CSoD to finalize the outbound integration and run unit test. There are currently 300+ courses available in the LMS. The first Webinar has been loaded and employees are beginning to sign-up to attend. <p>Benefits / Human Capital Management (Workday)</p> <ul style="list-style-type: none"> Testing and data validation continues in preparation for the Phase 2 load scheduled for 12/12/2011. Workgroup continues to compare the list of Workday standard reports to the HR/Benefits reports currently available in E1. Reports will be rewritten as needed. Initial HCM training has been completed (Nov). A training plan is under development which will include Lead training, on-line training, and Open Enrollment training. <p>The implementation for Benefits, Performance, and Human Capital Management is scheduled for February, 2012.</p>

<p>The RFP calendar of events is still on schedule with bid opening to occur on Friday, December 9. Communicating bid prices to prospective purchasers and finalizing all vendor contracts prior to the end of January 2012 will be the next big challenges. The Network Nebraska website redesign project has been “awarded” to the OCIO web development team since the UNCSN web development team has been reassigned to other more pressing projects.</p> <p>Budget numbers are unchanged since the 11/01/2011 report, with no new expenses to report.</p>

<p>System training began on September 6, 2011 and will continue until mid-November. During that time the team will continue to bring additional data sources online and work through minor punch list items. The train the trainer has been completed, but the training of users has been delayed until a connectivity issue can be worked through (see below).</p> <p>Issues: We have encountered a system stability issue that relates to the current server configuration. This is an issue that causes the server to re-boot due to a very low level error. The error itself has not yet been identified, but the teams will be updating the operating system patches to be consistent with a stable server within a stable server.</p> <ul style="list-style-type: none"> The system stability issue has potentially been resolved with the addition of proper server patches. We are holding on stating completion to ensure that the system remains stable. 12/1/2011 - The team made a determination that the system stability issue has been resolved. <p>Regarding the connectivity issues – the state’s mobile environment caused our developers to explore a web environment that provides access to all law enforcement agencies. This creates some complexities with user authentication.</p> <ul style="list-style-type: none"> 12/1/2011 - The team has a solution in place to resolve the user authentication issue and is working on towards implementation. The plan would provide for the work to be completed during this month.

<p>December 13, 2011 Update – Training on updated software was completed. DRC and CAL continue to support districts in utilizing the LCS system on local servers. NDE has encouraged districts to complete the software installation and test the system through practice testing on Writing, Reading, Math, and Science Assessments. The updated software includes a revised dictionary that is more appropriate for use with secondary school students and a newly developed practice test using NeSA Science items.</p> <p>Check 4 Learning Training (C4L) has been planned for December 2, 14, and 19. C4L is an online assessment system where teachers will be able to build classroom assessments in the same format as the NeSA assessments using teacher developed quality items. From November 29th through December 1st reading, math, and science teachers reviewed the submitted items for content and format to build the C4L item bank. These items will be submitted to CAL for implementation of the system starting the end of January.</p> <p>A preliminary PreID file was submitted to DRC in November. A few data errors were noted in the data and adjustments</p>						

Nebraska Information Technology Commission Enterprise Project Status Dashboard – As of December, 2011

were made. The student information PreID file for all subjects will be provided on December 8th. This will be the final upload for the writing assessment. Any additions changes in the student information will be submitted by districts through the eDIRECT system. A final upload of updated student data will be submitted to DRC on February 3, 2012.

The test window for NeSA-Writing (NeSA-W) is January 23, 2012 through February 10, 2012. The test window for NeSA – Reading, NeSA-Math, and NeSA-Science is March 26, 2012 through May 4, 2012.

<p>Construction began in September, with completion and system testing and signoff taking place in December. In the Southwest region, all path studies, tower mapping, structural analyses and grounding tests have been completed and equipment will be ordered in January. Completion and signoff of the Pilot Region is a prerequisite for starting construction in the rest of the regions. In the South Central and Southeast regions, all path studies, tower mapping, structural analyses and grounding tests have been completed. Equipment will be ordered for South Central in January. In the remaining regions (East Central, Northeast and Tri-County) much of the pre-construction work has been accomplished.</p> <p>Project is moving forward nicely with lessons learned in the Pilot Region making it easier to perform tasks in subsequent Regions.</p> <p>Will upcoming target dates be missed? Possibly. Based on the uncertainty of the infrastructure needed for the project and the time involved in obtaining the environmental approvals to proceed with the project, any target dates are fluid.</p>
