WORK GROUP UPDATES AND OTHER BUSINESS

Accessibility Work Group, Christy Horn. Ms. Horn hopes to get the work group together soon. The University of Nebraska is getting pressure on accessible media which is also an issue for K-12.

Mr. Weir would like the Technical Panel to have discussions in the very near future about the following items:

- Cloud computing. He asked if the Technical Panel should develop standards and guidelines. Discussion followed regarding right to access data. Mr. Becker stated that the Security Architecture Workgroup has been developing a standard regarding third party hosted data. Chris Hobbs will be invited to the next meeting to discuss the issue.
- Data Centers. Mr. Weir asked what would be compelling reason to build a data center versus using the cloud. Is there a more economical way to build a data center? He looked at what others were doing. The University of Iowa has built a data center that is funded by the state. Iowa is focusing on security and “green” technology. All their servers are in one location. Mr Weir would like to discuss options for Nebraska.
